KESHAV PRASAD SINGH

Product Manager | Data Driven | Analytics

Keshav_nitrkl@yahoo.com https://www.linkedin.com/in/singh-keshav23/ Portfolio link 8886933378 Hyderabad-500032

SUMMARY

Fintech Product Manager (13+ years) with expertise in Merchant Reporting, Fraud & Risk, and Transaction Lifecycle products. Proven ability to deliver high-impact features, streamline decision workflows, and partner with engineering and business teams to drive measurable results. Now building AI-native products including LLM-powered copilots, decision intelligence systems, and multi-agent architectures.

EXPERIENCE

Paysafe – Product Manager May 2017 – Sep 2024

As a Product Manager, Keshav's roles and responsibilities have been

- Led product initiatives across Fraud, AML, and KYC, improving real-time transaction monitoring and risk decisioning for a global payments platform.
- Designed and launched a 360° KYC data layer, integrating customer, merchant, and behavioural data into onboarding and continuous risk monitoring workflows.
- Partnered with data science, engineering, and compliance teams to build rule-based and ML-driven detection systems, reducing fraud exposure while ensuring regulatory compliance.
- Responsible for setting up Reporting API features for Merchant Reporting services & insights for UK/EU Acquiring Merchant - increased merchant engagement in the portal by 30%
  - Providing Payment partners with an efficient and secure way to receive business-critical reports
  - Wireframed and configured a Report Scheduler, a core Saas product on the platform to reduce operational cost by ~200k and platform deployment time by 2 weeks per request.
- Responsible to increase Merchant Onboarding experience. Involved in setting up analytics to improve merchant drop-off from onboarding steps. Setting up North Star metrics and other sub-metrics for business-critical decisions. Accelerated the automated onboarding process from 20% to 60%.
- Managed and mentored a team of 2 Product Managers and 3 contractors, fostering cross-team collaboration and aligning stakeholders across multiple business units.
- Orchestrated cross-functional alignment between Engineering, Data, Compliance, and Business stakeholders to ensure roadmap delivery.
- Utilized tools like Jira, Confluence, Tableau, and SQL to manage backlogs, document user stories, and analyze fraud trends.

AI Product Experience / Generative AI, LLMs, Copilot Projects - Portfolio

- Designed and prototyped an AI-powered Trust Copilot for social media platforms leveraging LLM-based conversational agents, fraud detection signals, and multi-agent architecture to guide user decisions in real time.
- Built an AI-driven Return Prevention & Margin Optimization platform using predictive models, NLP classification, and decision engines to reduce e-commerce returns by 15–20% (concept validation).
- Developed working prototypes using Python & Streamlit, simulating Copilot interactions, trust scoring systems, and AI-assisted decision workflows.

Deloitte | Technology Consultant Aug 2013 – May 2017

Clients: Top Global Pharmaceutical, Insurance, and Financial Services Companies

Worked across multiple enterprise analytics and BI transformation programs for Fortune 500 clients, contributing to strategic reporting, dashboarding, and data visualization initiatives using tools like Tableau, SSRS, Crystal Reports, and SAP HANA.

Key Responsibilities:

- Collaborated directly with business stakeholders and product owners to gather requirements, estimate effort, and finalize reporting mock-ups and data visualizations.
- Designed and developed interactive dashboards in Tableau, SSRS, and Crystal Reports to support executive decision-making across pharma, insurance, and financial domains.
- Proposed and implemented visualization best practices to enhance report usability, business storytelling, and campaign effectiveness (e.g., brand execution analysis for pharma client).
- Developed and optimized complex SQL stored procedures, MDX queries, and SAP HANA views for use in analytical reports.
- Created and delivered client demos, technical documentation, and COE (Center of Excellence) decks to support ongoing and future analytics initiatives.
- Researched and evaluated BI tools and capabilities (e.g., Tableau vs. Analysis for Office) for fit-gap analysis and strategic tool recommendations.

Key Projects:

- Envision - Top Global Pharma Corp: Built dashboards for brand execution and retailer performance analysis to drive promotion strategy.
- Financial Modernization - Internal Deloitte: Delivered financial reporting and headcount analytics dashboards; contributed to revenue and risk tracking.
- BI Private Exchange - Insurance Client: Delivered executive dashboards to monitor agent, carrier, and enrollment performance using SSRS/SSAS.

Polaris Financial Technology – Technology Consultant July 2011 – Aug 2013
